Airport Operations: The number of arrivals and departures from the airport at which the airport traffic control tower is located. There are two types of operations: **local** and **itinerant**.

1. **Local operations** are those operations performed by aircraft that remain in the local traffic pattern, execute simulated instrument approaches or low passes at the airport, and the operations to or from the airport and a designated practice area within a 20-mile radius of the tower.

2. **Itinerant operations** are operations performed by an aircraft, either IFR, SVFR, or VFR, that lands at an airport, arriving from outside the airport area, or departs an airport and leaves the airport area.
